

The Evolution of a Great Company Continues.

Ice Cream Filling Equipment

Our line of Flex E Fill™ equipment has long been the unmatched industry standard and is recognized across North America as the workhorse of the filling room. Our Flex-E-Fill team of professionals are here to provide you with the parts, service and attachments that you need to keep your production lines running smoothly.

Packaging Perfection for over 60 Years.

Flex & Fill™

Features and Benefits

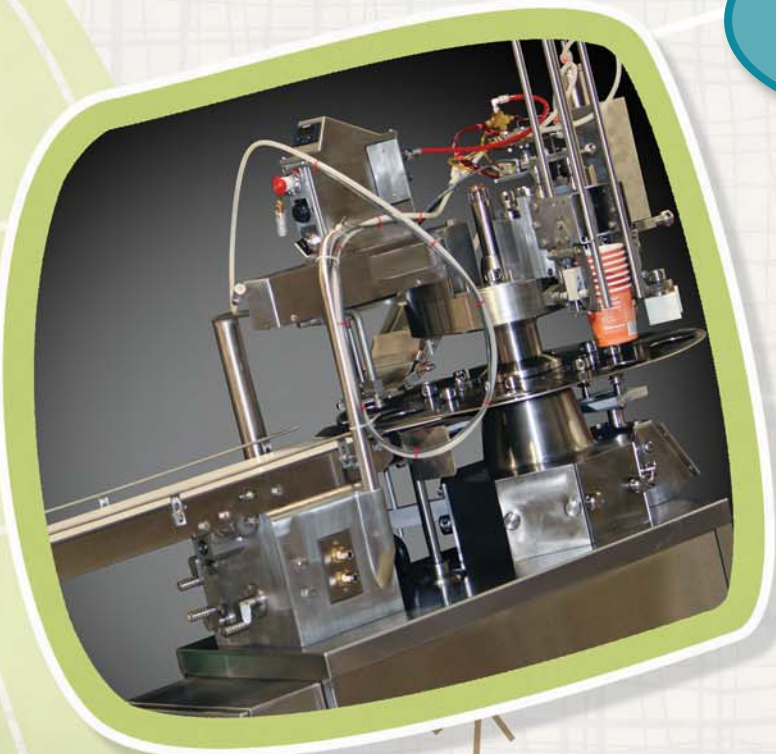

The Flex & Fill filling system is known for its versatility and simplicity, the rotary filler handles both round and non-round containers.

- Small foot print - it doesn't take up much space
- Portable - it can be moved easily onto or off of the production floor
- Quick and easy to change from size to size (attachments)
- Simple mechanical and electrical components
- Dedicated parts and service department
- Field service technicians located strategically across North America
- Easy to operate
- Durable and reliable
- Wash down construction
- Lidding can be accomplished either by elevator, spin rod feeder, pick and place or shuttle
- Present applications range from 3 ounce to 64 ounce round or scround sizes
