

Bulk Ice Cream PACKAGING

Another
great new
product from
Stanpac

Finally Something New & Exciting
For Bulk Ice Cream Packaging

Our paperboard bulk tub comes to you already formed and nested for easy dispensing and filling.

No more forming equipment in your facility taking up space, labour, and resources.

No sharp metal parts.

The tapered side of the container allows for easy visibility and easy scooping.

The matching composite lid snaps over the rim of the cup and features a groove for stacking and transport stability of filled containers.

Full colour printing capabilities bring your bulk package to a whole new level.

The automated Flex E Fill filler makes filling a breeze. Fills at rates up to 15 containers per minute with a small footprint.
