Flex & Fill™

BULK ICE CREAM FILLER

Tub dispenser de-nests a stack of cups.

Tub indexes to filling station where it is filled, tub spins for even filling.

Machine continues to index from filling to lidding section.

Lids are de-nested from stack and slide down chute for application.

Lid is wiped onto tub and snaps over rim of tub.

Finished 2.75 gallon tub exits filler on discharge conveyor ready for the freezer.
