

# The Evolution of a Great Company Continues.

## Dairy Packaging

As the resurgence of glass continues for milk, many dairies are broadening their product line to dairy by-products such as yogurt, butter, crème fraiche, cottage cheese, and spreads. Glass packaging sets your premium products apart from the rest. No other packaging shows your customer a natural high quality product like a glass container. Setting yourself apart in the marketplace is important to the success of your business. Call Stanpac today for product samples and pricing information. We are here to help!

**Packaging Perfection for over 60 Years.**

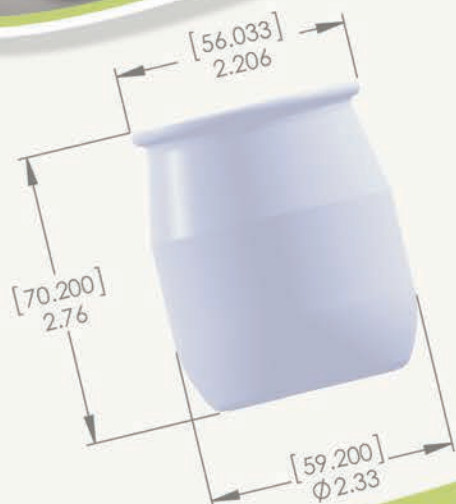

# Bottle Decorating Bottle

## Dairy Packaging

**4.70 oz. (139ml)  
glass container**

Primarily used for yogurt and single serve products. Either a plastic snap on lid or a foil heat seal lid are available.

### Filling and sealing equipment

There are several companies that build filling and sealing equipment from manual systems to fully automatic production lines.
