ABOUT STANPAC

Founded in 1949, Stanpac prides itself on providing incredible service and quality products. What first began as a manufacturer of milk bottle caps has since grown exponentially, offering ice cream, take-out and food service packaging, now employing over 600 people, serving more than 800 customers in over 30 countries.

Stanpac has remained a 100% privately held company with ownership belonging solely to the Witt brothers. We are dedicated to being good people who make great packaging; encouraging innovation, being leaders in the markets we serve and growing and developing our team of dedicated people.

SUSTAINABILITY

PAPER PACKAGING  Stanpac chooses paper for many of their ice cream and food service packaging products. Paper is a renewable resource that can also be recycled in areas where programs exist. All paperboard comes from companies that are SFI® certified. The Sustainable Forestry Initiative® program promotes sustainable forest management. By supporting the program, Stanpac is helping to strengthen forest practices in North America and promote responsible sourcing globally.

GLASS PACKAGING  Glass is the trusted and proven packaging for health, taste and the environment. It is also the only widely-used food packaging granted the FDA status of “GRAS” (generally recognized as safe) – the highest standard. The refillable glass milk bottles take that a step further. Reusing a bottle over and over again saves raw materials and energy. When a bottle is taken out of service it can be recycled and made into a new container, starting the cycle all over again. Glass is 100% recyclable and can be recycled endlessly without loss in quality or purity. Glass containers are made with a combination of raw materials, including sand, soda ash, limestone and cullet (recycled glass), resulting in containers that are durable, strong, and impermeable.
